All Creatures Veterinary Hospital Surgical/Anesthesia Options Tech Initial _____ Date_____

Your pet will be undergoing a procedure which will require the use of anesthesia. Although there are no guarantees with any procedure, we want your pet to be as safe as possible. Therefore, we offer the following:

Presurgical Profile **cost $76.85**
The Presurgical Profile is a blood test performed before we administer anesthesia and provides insight as to what is occurring internally. Included in this test is a Complete Blood Count or CBC (anemia, infection, clotting); BUN and Creatinine (kidney); ALKP and ALT (liver); Total Protein (hydration); Glucose (pancreas).

___ I want the Presurgical Profile
___ I decline the Presurgical Profile

IV Fluid Therapy **cost $55.63**
The IV Fluid Therapy is started prior to anesthesia and is given until recovery. It ensures proper hydration which improves blood pressure to vital organs while under anesthesia. It will be required for patients undergoing prolonged procedures of longer than 30 minutes, are 6 years of age or older, have a history of elevated liver or kidney values or a medical condition such as diabetes, infection, etc.

___ I want the IV Fluid Therapy
___ I decline the IV Fluid Therapy

Pain Control
Dogs- **cost $24.38 to $31.80 (Based on Weight)**
We offer Deramaxx for control of discomfort for any canine patient undergoing Surgery. Deramaxx is a chewable tablet that is given once daily for 5 days.
Cats-
We offer Metacam liquid for pain. cost $25.30

___ I want the Pain Control
___I decline the Pain Control

Antibiotics **cost $40.66**
If your cat is being declawed, we offer post-operative antibiotics. Whether or not you chose to get the antibiotics , we ask that you change your cat's litter daily and check the paws for any swelling or discharge.

___ I want the Antibiotics
___ I decline the Antibiotics

E-Collar **cost $5.72 to $23.85**
When your pet has been dismissed from the hospital, you will be responsible for monitoring the suture line. Some pets will lick the incision area and can pull sutures out. We offer "E-Collars" to help prevent the pet from licking. If your pet chews out the sutures or induces an infection, there may be a charge in addition to the surgery charges.

___ I want the E-Collar
___ I decline the E-Collar

Overnight Hospitalization **cost $47.39**
We ask that you keep your pet quiet the night after surgery and restrict the amount of food and water your pet consumes. If you prefer, we can keep your pet overnight to monitor your pet's temperature and incision, keep your pet confined, and offer the first feeding after surgery.

___ I want the Hospitalization
___ I decline the Hospitalization

Retained Deciduate Teeth **cost $17.21 per tooth**
Young pets sometimes have retained deciduate teeth. If the teeth are not pulled, they can cause malocclusion and prompt plaque and tartar formation.

___ I want the Extraction
___ I decline the Extraction

Post extraction dental x-ray ____Yes ____No
